

Hands On Newsletter

Quarterly Employee Newsletter

Second Quarter 2020

Message from Alejandro Badia, M.D., F.A.C.S.

"First of all, thanks to all the employees during the last three months, for I know it hasn't been easy for anyone, including myself. Fortunately, we are coming back stronger. Let's welcome our first Quarterly "Hands On" Newsletter for staying informed and create some engagement. Finally, I wanted to share that June 15, 2020 is the publication date of my book "Healthcare From The Trenches". I hope you can order it now (available on Amazon.com) and share the link www.drbadia.com/book with your friends and family."

Birthdays | Let's Celebrate Them!

Patients Reviews / What our Patients say about US

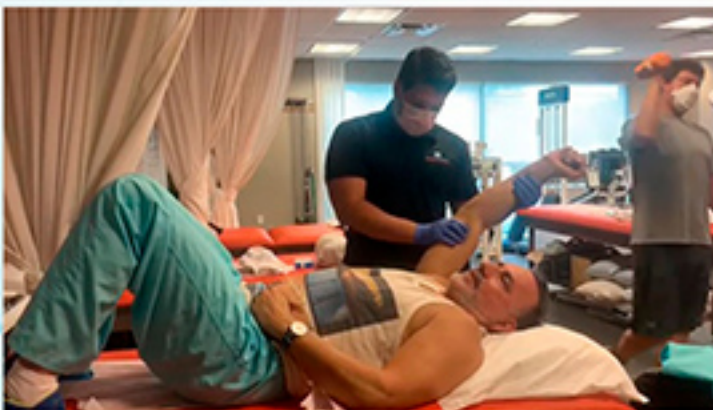

Patient Testimonial 10 Days After Surgery

Watch this video testimonial from a patient who experienced a thumb injury. The thumb replacement surgery was performed by Dr. Badia. The patient has recovered fast and well and you can watch the video displaying thumb mobility only 10 days after surgery.

Latest Procedures / Surgeries

Dr. Badia – Shoulder surgery (4/2/20) on road to recovery

COVID-19 / Going Back to Work

What our BHS center is doing to keep associate and patients safe during COVID-19

- Reconfigured waiting room for social distancing
- Everyone must wear a mask
- Patients are not allowed to enter the office wearing gloves
- Only 6 patients in waiting room at one time
- No guest or children in waiting room or exam rooms (unless child is the patient, parent / guardian will be allowed)
- If waiting room is at capacity, any additional patients will be asked to wait in their car or outside until they are called to return
- Scheduling some non-urgent visit via telemedicine to minimize the potential spread of COVID 19 and maintain social distancing while we provide orthopedic care
- Sending e-blasts to inform patient of telemedicine services available
